Document Type	Incident Reports

Incident INC-2026-014 — Payment Gateway Timeout Spike

On 2026-07-18, NovaCare observed an increase in Payment Gateway timeout responses affecting customers using NovaCare Premium. Customers reported failed payments, uncertain transaction states, and delayed subscription activation.

• Symptoms: payment timeout, subscription mismatch, duplicate-payment concern.

• Root cause: elevated latency between NovaCare payment orchestration and the external gateway.

• Impact: increased billing-related support tickets and delayed entitlement activation.

• Resolution: gateway latency was reduced and reconciliation jobs were reprocessed.

• Support action: verify transaction status before retrying or refunding.

Incident INC-2026-021 — Authentication Service Login Failures

On 2026-07-29, a deployment issue caused intermittent authentication failures. Multiple customers reported inability to log in.

• Symptoms: login failures across unrelated accounts.

• Root cause: authentication deployment configuration error.

• Impact: customer access disruption.

• Resolution: configuration rollback and service validation.

• Support action: link affected tickets to the incident rather than treating each ticket as an unrelated account problem.

Incident INC-2026-027 — Refund Processing Delay

On 2026-08-05, a reconciliation backlog delayed processing for a subset of eligible refunds.

• Symptoms: customers reported refunds not yet received.

• Root cause: delayed reconciliation processing.

• Impact: increased refund complaints.

• Resolution: backlog was cleared and affected refund records were reconciled.

• Support action: verify refund initiation timestamp and status before escalating.

Cross-Incident Intelligence

These incidents demonstrate why SupportMind must connect tickets, customers, products, services, policies, and historical resolutions. Similar future tickets should be retrievable using both semantic content and structured metadata.
