Document Type	Product Documentation

1. Platform Overview

NovaCare Technologies provides subscription-based digital services through NovaCare Basic, NovaCare Premium, and NovaCare Business. Core platform services include Authentication Service, Subscription Service, Payment Gateway, and Notification Service.

2. NovaCare Premium

NovaCare Premium provides advanced features and recurring billing. Entitlement depends on Subscription Service state. Billing events are processed through the Payment Gateway.

3. NovaCare Basic

NovaCare Basic provides the standard service package and may be used as a lower-cost subscription option. Billing and account management follow the same core platform controls.

4. NovaCare Business

NovaCare Business supports organizational accounts and may require additional account verification. Payment and subscription state remain authoritative through the Payment Gateway and Subscription Service.

5. Service Relationships

The Authentication Service controls access. The Subscription Service controls entitlement. The Payment Gateway processes billing. The Notification Service communicates selected status events. A failure in one service can produce symptoms in another.

• Payment Gateway timeout → uncertain payment state.

• Uncertain payment state → possible subscription mismatch.

• Subscription mismatch → customer access or billing complaint.

• Repeated gateway timeout → potential platform incident.

6. Known Issue Patterns

Common support issues include payment timeout, refund delay, login failure, subscription cancellation confusion, and duplicate payment reports. Troubleshooting and incident procedures provide the operational response.
